

## UNIQUE TOTALGARD™ FEATURES

There are over 500,000 dento-facial and temporomandibular joint (TMJ) injuries per year to athletes. This number is increasing due to the increasing number of young individuals participating in sports year round. Lip lacerations, fractured teeth, loose teeth and TMJ trauma are injuries that can be reduced with the use of mouth guards. Many of these young athletes, ages 7-18, are also undergoing some form of orthodontic treatment. Their lips are even more prone to lacerations from impact trauma against the braces. Mouth guards for these athletes are necessary for all sports - Even for the so called non contact sports, such as, soccer, basketball, and baseball.

### Designed With:

- Flexible extensions that fold into the area for comfort
- 4.25 mm posterior bite tabs that help protect TMJ, prevent anterior teeth from clashing and doesn't cause gagging.
- Anterior opening for easy breathing and speech

### Designed To:

- Fit over all braces and appliances (ie: Expanders, retainers, etc.)
- Help protect both upper and lower teeth
- Help protect TMJ
- Help protect lips

### Designed For:

- Natural retention through the muscles of the lips and cheeks
- Comfort and protection
- Easy breathing and speech
- Easy fit - NO BOILING
