

## First Honey® Skin Therapy Cream

A deeply nourishing cream powered by the natural bioactive properties of Manuka honey – free from any contaminants and irritants.

First Honey Skin Therapy Cream is made with the highest quality, medical-grade Manuka honey which is harvested from bees in New Zealand. This advanced healing cream is quickly absorbed into the skin to provide maximum protection from environmental factors and promotes healthy, hydrated skin.

Medical Grade 12+ Manuka honey – Our Manuka honey contains Methylglyoxal which give it the potent properties to mend and nourish damaged skin. First Honey products are rated 12+ which assures its purity and efficacy. We test every batch to ensure our strict criteria for medical usage are met.

### Details:

A deeply nourishing cream powered by the natural bioactive properties of Manuka honey to soothe and moisturize dry, irritated skin. Infused with the highest quality medical grade Manuka honey, harvested from our own bees in New Zealand, this advanced healing cream absorbs into skin quickly, provides protection from environmental factors, and promotes healthy, hydrated skin.

### From Hive To Healing

In the small town of Masterton, New Zealand, beekeeper, nature lover, and scientist, Denis Watson and his son Daniel, have dedicated themselves to providing the highest quality honey harvested from the powerful nectar of the native Manuka flower. Through research and innovation their global team of chemists have uncovered the unique nourishing benefits found within Manuka honey. From these discoveries First Honey was born. Created for the moments in everyday life when you need safe and effective care for the ones you love.

### What Does Medical Grade 12+ Mean?

Manuka honey contains the presence of Methylglyoxal giving it the potent properties to mend and nourish our skin. The 12+ rating is a measurement of the natural chemical characteristics within Manuka honey, which assures its purity and efficacy. First Honey tests every batch of Manuka honey to ensure it meets our strict criteria for Medical Grade usage, free of any contaminants or irritants.

### INGREDIENT:

INCI Name	CAS Number	Percentage
Aqua (Water)	7732-18-5	≤%38
