

Of all the fish oils **scientifically tested Eskimo-3** was found to have the lowest levels of contaminants, which included dioxins and dioxin-like PCBs. Also, the concentration of heavy metal contaminants such as **cadmium and mercury were below detection levels in Eskimo-3.**

- **Eskimo-3** is free from environmental contaminants, unlike many other fish oils on the market today.
- **Eskimo-3** is a natural fish oil made from deep-sea fish. Some fish oil products have been chemically modified to increase the concentrations of EPA and DHA. Studies indicate that natural fish oils can have more favourable effects than chemically modified products.

Eskimo-3 contains natural antioxidants, making it incredibly stable. Most fish oil products available today lack these antioxidants and so become rancid when exposed to air, causing more harm than good.

You will find it reassuring to know that your health is in the best possible care when you choose **Eskimo-3**. We have received vast numbers of letters and kind comments over the years that demonstrate the success that so many people have had while using **Eskimo-3**.

The Nutri Guarantee of Quality

“This is the best way we can underline the confidence we have in our range and how much we value your custom. This is not built on any promise, but on absolute trust. So, if you or your patient are not completely satisfied with the quality of a Nutri product, simply return it to us within 30 days of purchase. As soon as we receive it, we will send you a full refund.

No quibbles! No delays! Every single Nutri product is backed with this comprehensive cast-iron guarantee.”

Eskimo Kids Omega-3,6 + 9 Oils

“Tastes so good they’ll even lick the spoon!”

Enlightened parents are realising that their children need more than just a multivitamin to support their health and achieve optimum performance at school. You will be delighted to discover that new Eskimo Kids has been specially formulated through extensive scientific research to give your children just the right combination and balance of vital natural omega oils.

Recent publicity regarding fish oils and brain development in children makes new Eskimo Kids all the more exciting. Give your child the best chance in life with new Eskimo Kids.

Eskimo Kids is a naturally pure and stable omega fish oil liquid supplement, **especially adapted to the needs of children** and comes in a great tasting, natural, tutti-frutti flavour that kids just love!

- A healthy balance of Omega-3, 6 & 9 fatty acids
- From fresh, deep sea fish and not from cultivated fish
- Environmental toxins, e.g. mercury and pesticides, like PCBs and DDT, well below the acceptable limits
- Contains Vitamin D for healthy bone development in growing children
- Vitamin E helps to keep it fresh for longer
- Kids love the natural tutti-frutti flavour, which comes from a combination of orange, raspberry, lemon and cherry oils

You and Your Family need more than a Multivitamin

Many enlightened people are realising that they and their families need more than just a multivitamin to support their health and achieve optimum well-being. Independent research is demonstrating time and time again the value of essential fatty acids found in omega-3 fish oils. The Eskimo product range has been meticulously researched and formulated to provide you with incredibly pure omega-3 fish oils to support you and your family's health requirements.

There's Something About the Eskimos

We are so proud of our unique **Eskimo-3** fish oil that we want to share with you the secrets surrounding its origin. Sourcing and developing innovative, remarkable products is something we have always done at Nutri. Being directly inspired by the Greenland Eskimos, we feel that **Eskimo-3** is that extra bit special and as our most successful product, worth telling you a bit more about.

In the Beginning

It started over twenty years ago when two physicians visited Greenland to observe the Eskimos. They noticed that although Eskimos consume large amounts of fat, they avoid many of the conditions associated with a high fat diet. This was thought to be because they consumed large amounts of omega-3 EPA and DHA fatty acids. Having published over 400 papers, mainly in cardiovascular medicine, Professor Tom Saldeen decided to undertake further research into

these revolutionary ideas. He concluded that these fatty acids are indeed highly beneficial to health but are often significantly lacking from the western diet.

Developing One of the Purest and Most Stable Fish Oils

The next stage was to find a way of incorporating these beneficial fatty acids into our diets without consuming the same amount of fish as the Greenland Eskimos! Fish oil quickly goes rancid during exposure to oxygen, so to prevent this natural deterioration, the original antioxidants of the fish oil had to be restored. Fish oil is also susceptible to contamination from heavy metals such as mercury and also from environmental chemicals. Eskimo-3 researchers had to develop a method of removing these harmful toxins from the oil. The extensive research and development behind **Eskimo-3** has made it one of the **purest**, most **stable**, and therefore most **effective** fish oils on the market today.

Eskimo Fish Oils: Invaluable to the Whole Family

Eskimo fish oil really is the ideal way to support all your family's health. The advantages of supplementing with Eskimo fish oils are so widespread that everyone from toddlers & teens, to more mature family members can benefit greatly from using it as a daily supplement.

- Eskimo fish oil provides valuable omega-3 fatty acids EPA & DHA, which are often lacking in those who rarely eat fish.
- Fish oil plays a significant role in supporting the cardiovascular system because of its effect on blood pressure, lipoproteins, cholesterol, prostaglandins and fibrinogen.

- People who consume large amounts of fish or fish oil have a decreased risk of developing cardiovascular conditions.
- Omega-3 fatty acids help to keep the skin supple and elastic.
- Fish oil has been well researched for its role in helping to support healthy joints.
- Over 60% of the brain is made from fat!

A Wide Range of Choice

Eskimo-3 is available in capsule and a pleasant tasting liquid form. The capsules are available in 105 capsule size and for those individuals wanting to seek extra value there is a 250 capsule size.

Many people benefit from the larger volume when they are trying to support chronic conditions by taking larger daily quantities of Eskimo-3. Those people who find it hard to swallow capsules find the natural lemon tasting Eskimo-3 Liquid a great alternative. Finally, there is liquid Eskimo Kids, which has been specially adapted to suit the needs of children. It comes in a

Tutti-Frutti flavour made from natural fruit oils that kids just love direct from the spoon or in their juice.

Incredible Stability & Purity

Eskimo-3's stability and freshness sets it oceans apart from the rest. It is this incredible purity and freshness that enables **Eskimo-3** to retain its stability long after many alternative products have turned rancid.

A Greenpeace study found that many fish oil supplements contained toxic chemicals and organochlorine pesticides. The Ministry of Agriculture, Fisheries and Food (MAFF) later confirmed these findings. A recent survey by the Food Safety Authority of Ireland examined a range of popular fish oil capsules for the presence of dioxins.
