## HOW DOES ALOCLAIR WORK?

Aloclair contains Polyvinylpyrrolidone (PVP) which forms an invisible protective coating over the ulcer. This unique action relieves pain by covering up exposed nerve endings and stopping irritation occurring during eating, drinking and talking. It also promotes healing by creating a sterile, protected environment which stops food and bacteria entering the sore.

Other ingredients, including natural aloe vera, glycyrrhetic acid and sodium hyaluronate help to soothe and heal the sore quickly.

### Before

### After

## IS THERE ANY CLINICAL EVIDENCE FOR ALOCLAIR?

In 2003, Aloclair was tested by a group of patients from a UK dental practice. The results showed pain relief occurred just 3 minutes after application and lasted on average for 5/6hours.\*

In 2002 an Italian study tested the efficacy of Aloclair on children. 90% of patients had severe pain or moderate pain before using Aloclair. After applying Aloclair for the first time 95% of the patients felt no pain or only slight pain.\*

## WHY IS ALOCLAIR BETTER THAN OTHER MOUTH ULCER TREATMENTS?

Aloclair contains NO alcohol and is the ONLY non stinging treatment for mouth ulcers and oral lesions. This means it is ideal for treating babies and children.

Aloclair offers long lasting pain relief and promotes healing fast. It doesn't cause further damage to the soft tissues in the mouth.

Aloclair is hygienic. Specially designed applicator nozzles mean it's quick and easy to apply and there is no need to use dirty fingers.

## WHO IS ALOCLAIR SUITABLE FOR?

Aloclair is suitable for all ages, including babies and children. It is ideal for abrasions caused by braces and dentures and has no known interactions with other medications.

## WHAT PRESENTATIONS OF ALOCLAIR ARE AVAILABLE?

- Mouthwash 120ml and 60ml. Ideal for multiple ulcers
- Spray 15ml Easily reaches ulcers at the back of the mouth. Great for treating kids.
- Gel 8ml - NEW! Great for using 'on the go'. Applicator nozzle ensures easy and mess free application.
